Legend

Rectangle entity set, attributes listed inside as *name : TYPE*; underline = primary key
Double rectangle weak entity set; dashed underline = discriminator; **double diamond** identifying relationship set
Diamond relationship set; **rectangle + dashed line** attributes of the relationship set
l..h on each line: minimum..maximum times an entity takes part in the relationship set (* = many)
Double line total participation (l ≥ 1); single line partial participation (l = 0)
Indented attributes components of a composite attribute; *a()* derived attribute
Hollow arrow specialization: one arrow per subtype = overlapping, joined arrow = disjoint; 'total' annotated
